

Style Guide

I created a style guide that could be followed to ensure consistency throughout the system. The system uses color in order to make the user’s interaction easier and more predictable. It is used to assist in navigation, highlight important information, and create a more cohesive and enjoyable user experience.

Colors

Primary Colors

I used orange-like color because this color combines the energy of red and the happiness of yellow. Also it elevates sense of fascination, attraction and stimulation of the users towards the product.

Secondary Colors

Accent Colors

Neutrals Colors
